Project Reference

Remedial Works

Uggool Windfarm Park

Description

The remedial works required to seal the Foul Tank on this project presented a difficult task as the reinforced concrete tank were buried below ground.

SURFASOLOGY approved applicators, Hollywell Construction Limited, who's operatives are fully certified for confined space working and are specialists in the field of crack injection and concrete repairs successfully complete the remedial works in accordance with the Site-Specific Method as provided by SURFASOLOGY.

The remedial works included cleaning the substrate, detailing of the voids under the concrete roof capping and repairs to the walls of the tank using EasySeal, Maxplug and Concreseal 5.

In addition, a Flexible Polyurethane Resin was pressure injected and Maxseal Flex was applied as a waterproof protection coating.

All products used on this project are fully approved and were supplied by SURFASOLOGY.
