

Ennis Garda Station

Ennis, Co. Clare

Description

This was a major refurbishment of out-buildings undertaken by the very capable team of A2 Architects, Malachy Walsh & Partners, and Martins Construction.

Substantial remedial works to the walls and floors of this structure were required, these works were completed using **SURFASFIX** SBR modified mortar.

Maxseal Flex, flexible cementitious waterproof coating, was used to waterproof the walls and the floors to provide a Type A (Barrier Protection) to the structure.

SURFASCREED 100 was applied to provide a protection layer on the floors.
