<b>Type of Job</b>	<i>Protection of the below-ground concrete base slabs</i>
<b>Products</b>	<i>CEMtobent CS Plus Waterproofing Membrane</i>
<b>Main Contractors</b>	<i>Cregmore Construction Limited</i>
<b>Location</b>	<i>Moycullen, Co. Galway</i>
<b>Construction Completion</b>	<i>2015 - 2019</i>

### Description

CEMtobent Membrane was selected to provide protection to the reinforced concrete bases for the below ground holding tanks of this major project located high up on the hills in County Galway.

The CEMtobent System is a unique sodium bentonite-based system. It was selected for use because of its protection of the reinforced concrete bases and the environmental protection it offers due to its self-healing and impermeable nature.

SURFASOLOGY supplied the materials and the materials were successfully installed by Cregmore Construction under the guidance of SURFASOLOGY.
