

Huntstown AD Tank Farm

Dublin 15

Description

The construction joints of the reinforced concrete in this major civil engineering project were detailed using CEMflex VB Plate.

CEMflex VB Plate was selected for use because of its suitability for use in reinforced concrete containment-bunds that contain a wide range of liquids including drinking water, sewage, liquid manure, silage, oils, gasoline, mineral oils, biological oil, etc.

Priority Construction were the main contractors and Murform Ltd were the formwork contractors on this project.
