

# Luas Cross City Line, Dublin

## Description

DualProof Waterproofing Membrane System was selected to waterproof the ground slab and walls of this below ground reinforced concrete structure. The roof of the structure was waterproofed using SilverSeal Waterproofing Membrane. The SilverSeal is compatible with the DualProof and the combined systems provide a Type A (Barrier) Protection to the complete structure.

The structure is located at Thomas Moore Island and houses critical electrical equipment for the Luas Cross City Line.
