

Oweninny Wind Farm

Bellacorick, Co. Mayo

Description

This reinforced concrete structure used to house the internal bunds for the transformers on the Oweninny Wind Farm was built by Hallquar Construction.

DualProof Membrane was placed on the exterior of the below ground structure to provide a Type A Barrier Protection.

The non-movement joints in this reinforced concrete bund, were detailed using CEMflex VB Plate, as this water-bar is resistant to a wide range of liquids including oils, gasoline, mineral oils, etc.
