

Rahelly House

Co. Sligo

Description

Dryzone Cream was used to install a chemical dampproof course into the old stone walls of this fantastic structure.

Repairs to the internal walls were completed using SURFASFIX SBR with Maxseal Flex was used as a flexible, breathable tanking material.

SurfaPore C water repellent was used to protect and enhance the stone work on the external face of the structure.

All works are being completed under the supervision of JP Feeney Architects.
